

# MICRO 600

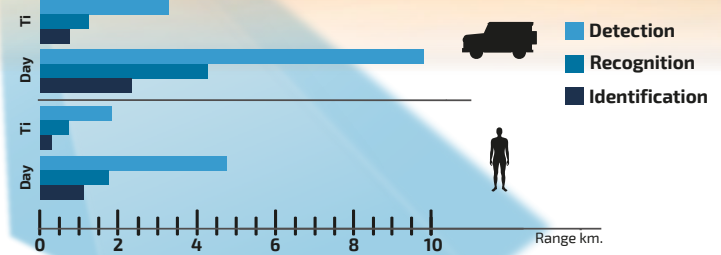

Miniature ISR System for sUAS

Coming Soon...

## Operational Impact Enhancement

- Two FHD Global Shutter VIS cameras
- Two Uncooled IR cameras - 12µm
- Simultaneous Video output
  - Parallel / PIP / Raw
- LOS Stabilization
  - Opto-mechanical stabilization
  - Digital stabilization
- Airborne ISR Tracker
- H.265 encoder
- Advanced Two Axis Gimbal Architecture
  - Brushless motors and precision encoders
  - Aerodynamics
- Seamless Integration
  - Ethernet interface
  - SDK for fast platform integration
  - Optional - H.265 decoder SDK
  - MavLink - Optional
- Inertial Navigation - Optional
- Optional AI Functionality
  - VMD -Video Motion Detection
  - ATR-Automatic Target Recognition
  - Homing tracker
- IP66
- Non-ITAR

## Maximum Performance Per Dollar

### Electro-Mechanical

Type: 2 Gimbal Gyro-stabilized System  
 Field of Regard: Elevation: -140° to +30°  
 Azimuth: x360°  
 Angular Velocity: Up to 120°/sec on both axes

### Thermal Nighttime Channel

Spectral Range: 8-12µm  
 Detector Type: LWIR uncooled 640x480  
 Zoom: Continuous zoom x16  
 Field of view: 32° - 2°

### VIS Daytime Channel

Detector Types: FHD CMOS Global Shutter  
 Zoom: Continuous zoom x31  
 Field of View: 57° - 2°

### Electrical Interface

Power Supply: 12-32 VDC  
 Power Consumption: Nominal - 20W  
 Video Outputs: H.265 over Ethernet

### Environmental Conditions

Operating Temperature: -30°C to +55°C  
 Ingress Protection: IP66
